Hi Ollie,  
Having visited Hawaii many times I have noted that there are many plants that grow there that are not in Australia ( I don't doubt that they would grow here as we have much the same climate )and vice versa - but am interested in the ones I can get hold of in Australia and how many there are availabale....thanks

Hey Ollie,

What you are calling Super Mini Pink is named Petite here in Australia. Yes you are correct it is the smallest Cordylines.  
Beautiful little thing too.
