
LETS TALK SPORTS!!!

Posted by OLLIE IN HAWAII - 2009/11/06 13:31

WHAT ARE SPORTS?
WHY DO THAY HAPPEN?
CAN YOU PROMOTE THEM?
CUTTING THEM OFF?
WILL MOTHER PLANT MAKE MORE?
ANY 1 GOT PICS? :)

A sport is where cells are damaged in the tissue and it creates a new/different looking plant..

For example Kiani is a sport from Early Morning Diamond.

You will notice that Kiani is simialr to Early Morning Diamond except it has blood red markings which makes it much more attractive than the parent plant.

You can also have sports that look nothing like the parent plant, for example... Sunset Strip is a sport from Tropic Sunset.

Here is Tropic Sunset... <http://www.cordyline.org/images/fbfiles/images/C-9611be4096c7b88421a94c732acde43e.jpg>

do you just cut them when there big enough and if so will the mother send out more of the sports?
how damaged are we talking?
