## Searching the Galleries

Posted by Jamie Clarke - 2009/08/12 13:32

---

Hi all

This is just a quick note on how to search the photo galleries. The search bar that is located on the home page is only good for searching the website content, not the photos....the following link ( [http://www.cordylane.org/index.php?option=com\\_zoom&Itemid=35](http://www.cordylane.org/index.php?option=com_zoom&Itemid=35) ) will take you to the front of all the galleries on the website. In the right hand side of this page approx halfway down you will see a search box:

[http://www.cordylane.org/images/M\\_images/searchbar.jpg](http://www.cordylane.org/images/M_images/searchbar.jpg)

Simply type the name of the cordylane you wish to search for and if its in the gallery it will be listed. Note you will not get the fancy loading of images as you do when just browsing the galleries manually.
