## maybe mildrew type spots on leaves

Posted by Cqueen - 2010/07/17 01:44

---

This is occurring on leaves where plants get quite a bit of water - like rust marks small orange/red spots - it is not mites - what is it?

=====

Margot... since we have just come through winter I would expect maybe it is just from the cold of winter.

Is it coming back now that it is warming up?
