Inserting Images into Threads

Posted by Jamie Clarke - 2009/09/14 16:54

_____

Hi all

To insert an image is quite simple - simply click the new thread button in the forum you wish to do a post. Then type in your subject, then your message. Once finished or at the position you wish to insert your image simply scroll down to "Select image file to attach" browse to your picture (800x800 max resoloution and can not be larger then 500KB)and select it.....once done click on the img button next to the browse button - this will insert a img tag, finish by pressing the submit button and your done. Below is my image attachment following the above procedure.
